Success story continues. ERA a.s. (CZ) & SMAG Mobile Antenna Masts GmbH signed a contract of the already 3rd. generation of container mast systems

Fast, Strong and Reliable

After the successful joint re-development, production and delivery of the container mast generation 1 and 2 the world wide leading German manufacturer of Mobile Antenna Masts, SMAG and the Czech supplier of passive radar systems ERA a.s. signed a supply contract for further container Antenna Mast Systems. The actual order is already the 3rd generation of the container mast from Salzgitter.

Wolfgang Schnelle (Managing Director of SMAG): "With this technical solution we successfully convinced an existing customer and at the same time we are able to serve a large demand in the market".

Salzgitter, January 2022

About SMAG Mobile Antenna Masts GmbH

SMAG Mobile Antenna Masts GmbH (SMAG) a subsidiary of Salzgitter Maschinenbau AG, is the unique manufacturer for Mobile Antenna Masts worldwide up to a height of 40m without using any kind of guy wires. The Mobile Antenna Masts are globally used for disaster and military operation, for mobile communication, radio and broadcasting transmissions. The mast systems are tailor made and can be mounted e.g. on trailers, trucks, containers, armored vehicles and platforms.

About ERA

ERA a.s. (a member of Omnipol Group) is a pioneer and leading supplier of next-generation surveillance and flight tracking solutions for the air traffic management, military, security and airport operations markets. As one of the developers of the respected technologies of multilateration and ADS-B and thanks to the company's traditional products ERA has 100 installations at a series of aerodromes, air traffic control centres and military organisations in 60 countries on all continents except Antarctica. For more than half a century ERA has built a proud heritage delivering multilateration based solutions such as wide area multilateration and surface surveillance to ATC controllers. Apart from systems for the civil sector, ERA has developed the unique passive radio-location system VERA-NG - an essential part of any modern defence surveillance network and advanced border protection.
